

About WICA Programme

(Works Industrial Computer Accountant)

WHAT WILL MAKE YOU AN EXPERT?

This course is highly result-focused, and you'll be taken step by step through everything you need, so you can replicate these results for yourself and learn best practices on live projects. You work practically in each module and generate results.

As the computer accounting landscape continues to grow at a rapid pace, accountants are faced with new challenges and opportunities within this computer age. The WICA (Works Industrial Computer Accountant) Programme is an initiative designed by Rising Commerce Classes to educate students and professionals in the area of Computer Accounting.

Students that plan to undertake the Accounting Profession Challenge are encouraged to complete the Computer Accounting Course, as the skills learned in this course will help them shape their strategy for the competition, get the most out of accounting carrier for their professional life after 12th class or Graduation and help to prepare them for the real life working experiance.
